Synthetic Organic Contaminants (Otisco, Ontario)			
Diquat Endophtall 2,3,7,8-TCDD (Dioxin)			

The frequency that various contaminants are tested for is regulated by the State and can vary from source to source. The State allows for some contaminants to be tested for less than once a year because the concentrations of these contaminants do not change frequently. Some of our data, though representative, is more than one year old. Some contaminants are monitored at the various sources more often than required.
