SOUTHWOOD TANK REPLACEMENT
TOWN OF DEWITT

OCWA is replacing the 200,000 gallon water storage tank located at 5018 Derringer Drive in Dewitt, NY. The welded steel tank has served the Dewitt area for over 60 years and is in need of replacement.

The work will generally consist of constructing a 500,000 gallon concrete water storage tank and appurtenances, and then demolishing the existing tank as well as completing any site restoration needed. During the construction of the new tank, the existing tank will stay in service. The new, larger tank will help improve resiliency in the service area and improve pressure stability and available water for fire-fighting capabilities.

The work on the tank is anticipated to begin in early April, weather permitting, and will take approximately one year to complete. Work will occur during normal construction hours. There should be no disruption of water services to the areas served as a result of the work on this project.

Questions or concerns can be addressed to OCWA contact Deb Owens at 315-455-7061 x 3131, or dowens@ocwa.org, or at the address above.
