

**SKYVIEW TANKS REPLACEMENT**  
**420 Skyview Terrace, Camillus, NY**

The Skyview water system in Camillus is now served by one water storage tank - a new 1,500,000 gallon (1.5 MG) concrete water storage tank. We are finishing the final grading, seeding and fencing for the site but the new tank has been operational since last fall.

It was formerly served by two welded-steel water storage tanks at 420 Skyview Terrace. One tank provided up to 2 million gallons (2.0 MG) of water storage while the other tank provided up to a half million gallons (0.5MG) of water storage. The welded steel tanks served the Camillus area for over 55 years and were in need of replacement. The slightly smaller storage capacity will help to improve water quality in the service area and better balance OCWA's operations in the Camillus area.

Questions or concerns can be addressed to OCWA contact Deb Owens at 315-455-7061 x 3131, or [dowens@ocwa.org](mailto:dowens@ocwa.org), or at the address above.
