SOUTHWOOD TANK REPLACEMENT
TOWN OF DEWITT

The Southwood water system in the Jamesville area of the Town of Dewitt is now served by a new 500,000 gallon (0.5 MG) concrete water storage tank. We are finishing the final grading, seeding and fencing for the site but the new tank has been operational since January 2020.

OCWA replaced the 200,000 gallon welded steel water storage tank located at 5018 Derringer Drive in Dewitt, NY. The tank had served the Dewitt area for over 60 years and was in need of replacement. The new, larger tank will help improve resiliency in the service area and improve pressure stability and available water for fire-fighting capabilities.

Questions or concerns can be addressed to OCWA contact Deb Owens at 315-455-7061 x 3131, or dowens@ocwa.org, or at the address above.
